ITALTECNO
India Pvt. Ltd.

Always in an innovative way and always at the customer's service.

PRODUCT CATALOGUE

ADVANCED TECHNOLOGIES FOR ALUMINIUM FINISHING

ABOUT US

- **Anodizing Chemicals**
- **Pre-Treatment Chemicals**
- **Anodizing Plants**
- **Powder Coating Plants**
- **Equipment's & Technologies**
- **Engineering & Process Solution**

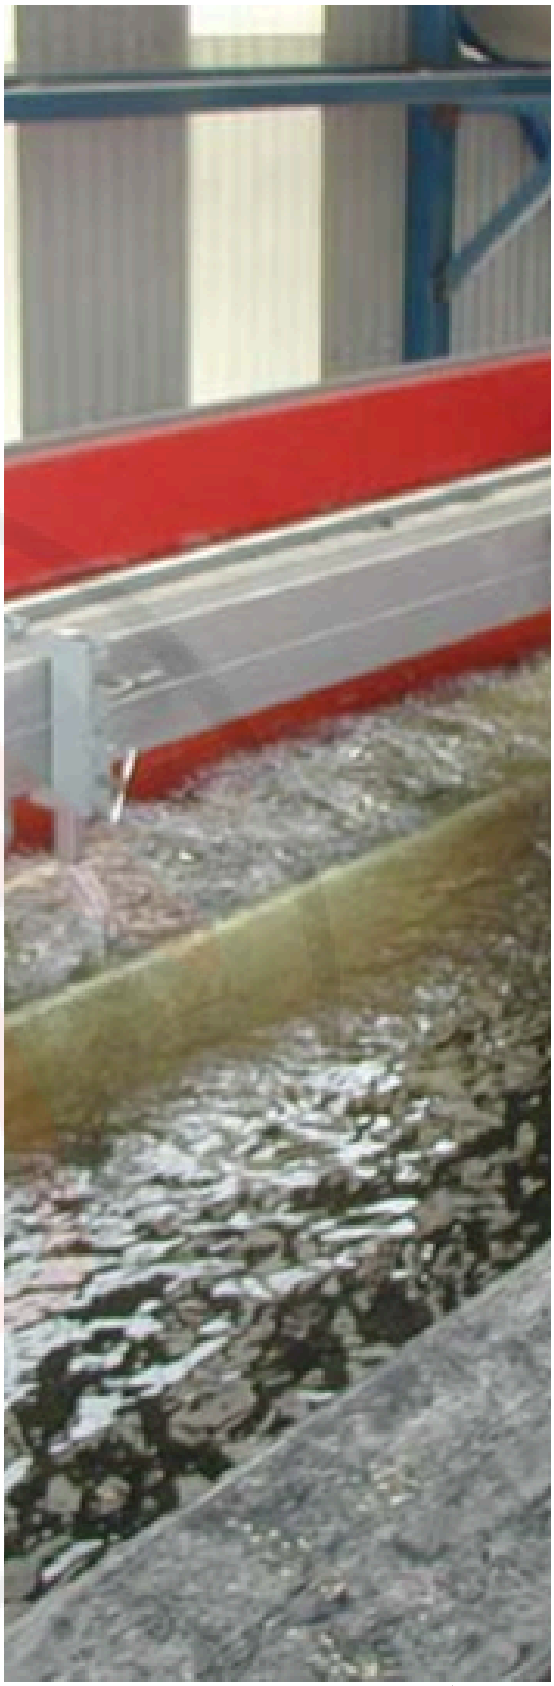

Italtecno India Pvt. Ltd. is a Bangalore-based manufacturer and supplier of high-quality aluminium finishing chemicals, providing reliable and innovative solutions to the aluminium finishing industry.

In addition to chemicals, we provide engineering solutions and customized plants and equipment from Italy for:

- Extrusion Die Cleaning
- Anodizing
- Powder Coating
- Aluminium Surface Treatment & Finishing

With a combination of Italian engineering expertise and local technical support, we offer customized solutions to meet the specific production requirements of our customers.

ANODIZING CHEMICALS

Degreasing
- MG 19 PA
- MG 19 L
- MG 19 NB4
- Tecnoclean SA

Acid Etching
- BE 11 L
- BE 12

Alkalin Etching
- MG 32
- MG 39

Desmutting
- Neutron 187 C
- Neutron 190

Anodizing
- WM 80 L
- AOX 300

Electrocoloring
- Tin Sulphate
- Salmix NF 40
- Salmix NF P

Special Electrocoloring
- Salkorall
- Warmall 1 & 2
- Tecnostab

Dye Colors
- Orfix
- Yellow AGR
- Rose Gold 2BR
- Black WH

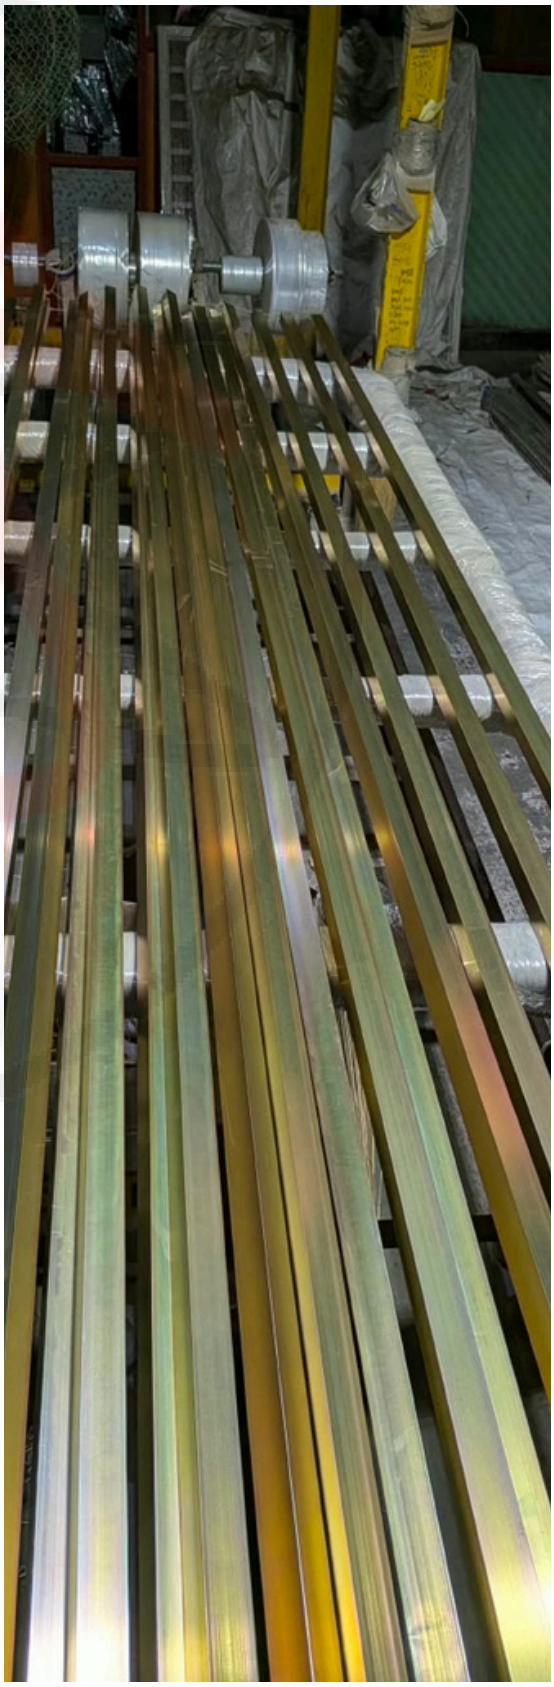

Sealing
- Hardwall 3CB1
- Pre-Fix Seal
- Hardwall MTS
- MG Seal TZ
- MG 11
- Superseal 2S

Spl. Additives
- MG 160
- Stab F63
- GR 20 L
- MG 21

PRE-TREATMENT CHEMICAL

Alkaline Degreasing

- Itaclean 113
- Itaclean 118

Acid Degreasing

- Itadox 161 AB
- Itaclean IP 4000

2 in 1

- Itaclean 211
- Itadox 307 NT

Desmutting

- Desmut A30
- Itadox 302

Chrome & Chrome Free

- Cover Gold 50R
- Alugold SCR

Acid (Short)	Acid	Alkaline + Acid
Acid deoxidizing **ITACLEAN 211 / ITADOX 307NT**	Acid degreasing **ITADOX 161 AB**	Alkaline degreasing **ITACLEAN 113 / ITACLEAN 118**
Rinsing	Acid deoxidizing **DESMUT A30 / ITADOX 302**	Rinsing
Demineralized water rinsing	Rinsing	Acid deoxidizing **DESMUT A30 / Itadox 302**
Chrome Conversation / Chrome-Free **COVER GOLD 50R / ALUGOLD SCR**	Demineralized water rinsing	Rinsing
Rinsing	Chrome Conversation / Chrome-Free **COVER GOLD 50R / ALUGOLD SCR**	Demineralized water rinsing
DRYER	Rinsing	Chrome Conversation / Chrome-Free **COVER GOLD 50R / ALUGOLD SCR**
	DRYER	Rinsing
		DRYER

Acid (Short)	Acid	Alkaline + Acid
Acid Deoxidizing	Acid Degreasing	Alkaline Degreasing
Rinising	Acid Deoxidizing	Rinising
Rinising Demi Water	Rinising	Acid Deoxidizing
Conversrion Treatement	Rinising Demi Water	Rinising
	Conversrion Treatement	Rinising Demi Water
		Conversrion Treatement

DIE CLEANING & CAUSTIC SODA RECOVERY

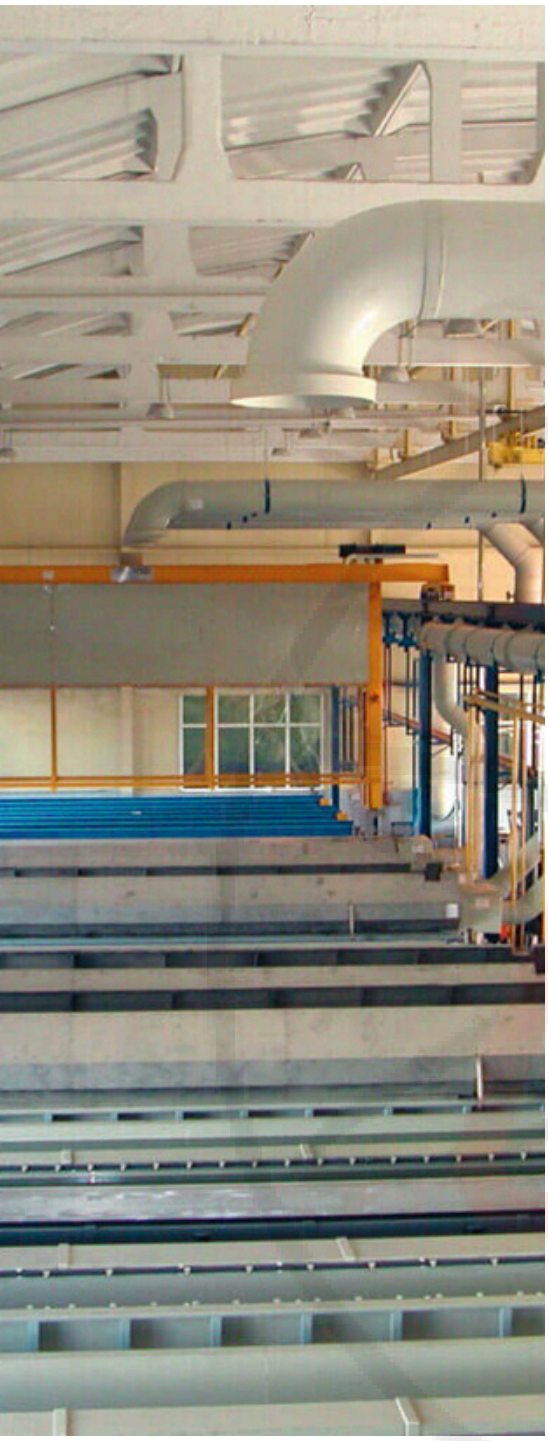

With an INTEGRATED DIE-CLAR & CRYSTALFIX SYSTEM all the advantages connected to each individual technology are summed together and provide a total answer to the problems caused by the conventional dies pickling systems:

- Fully automatic operations, from dies cleaning sequence to spent caustic soda recovery
- Highly environmental friendly process
- Total enhancement of safety for workers
- Recovery of aluminium metal
- Recovery of caustic soda
- No spent toxic/hazardous waste to be disposed or to be treated

ANODIZING PLANT

COMPLETE SOLUTIONS FOR ALUMINIUM ANODIZING

We provide complete anodizing plant solutions for aluminium extrusion and finishing industries, combining advanced engineering, reliable equipment, process technology, and customized plant design

With Italian engineering and technology, we offer reliable and efficient solutions including pretreatment, anodizing, colouring, sealing, rectifiers, cooling, filtration, automation and material handling systems.

POWDER COATING PLANT

Vertical

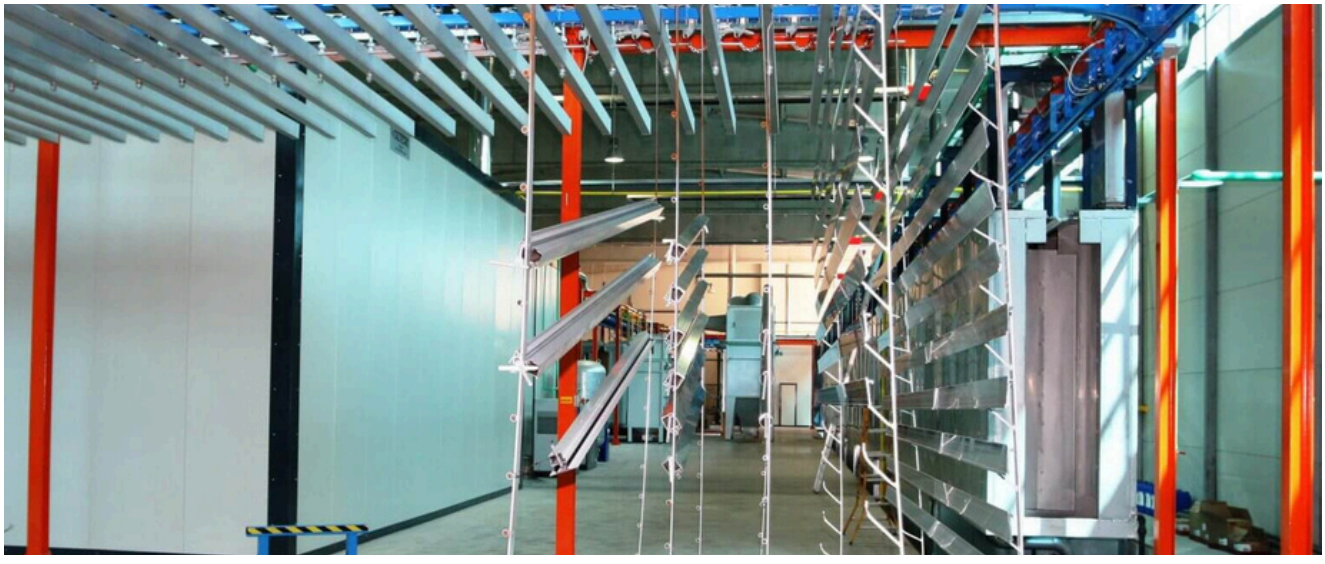

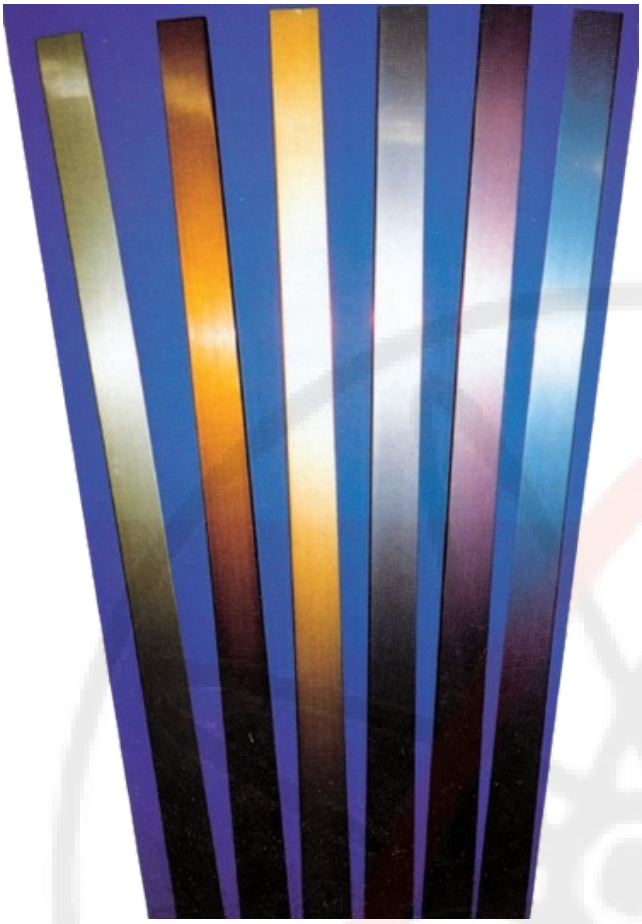

Compact

We provide complete, customized powder coating plant solutions for aluminium extrusion industries, from design and engineering to manufacturing, installation and commissioning. With Italian engineering and technology, our solutions include pretreatment, powder coating booths, curing ovens, conveyor systems, heating, filtration and automation.

Our plants are designed to deliver consistent coating quality, high productivity, efficient operation and reliable performance.

Horizontal

MULTICOLOR

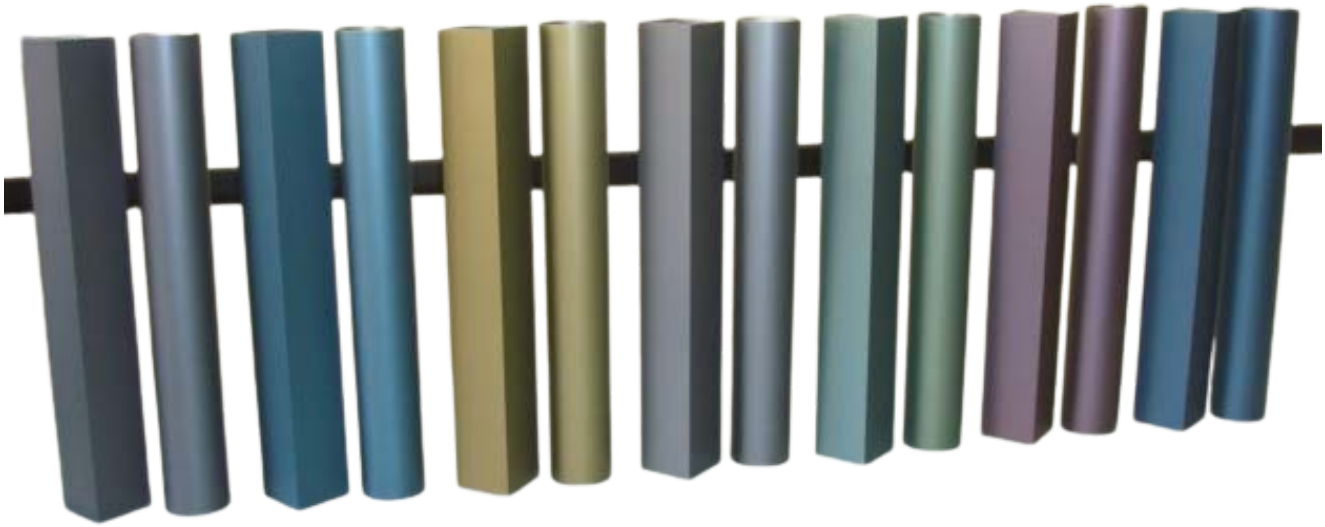

Electrocoloring Process For Grey, Blue, Green & Many other Colors

Multicolor is a revolutionary electrocoloring process capable of producing a range of colors from grey, blue, green. This process involves a three step procedure.

FREEAL PLUS

Sulphuric Acid Recovery System

Fully automatic control of aluminium concentration.

FREEAL is a unique technology designed to improve the efficiency of anodizing baths as well as of different types of acid pickling processes.

FREEAL is designed with the aim to **maintain the aluminium content in the solution at a constant desired level**. This is achieved by drawing quantities of the acid solution from the process bath into the FREEAL system, purifying and delivering it back to the bath.

Great saving | improved quality of Anodic Coating.

ADC DOSING SYSTEM

Automatic chemical dosing

ITALTECNO Srl, listening to the needs of its customers, has developed an appropriate system that allows the automation of the addition of chemicals to the main chemical treatment tanks, the so-called ACD

Where the ACD device applies

- Electrostatic coating plants (powder or liquid) of aluminum and steel
- Aluminum anodizing
- Wastewater treatment plants for the above production processes

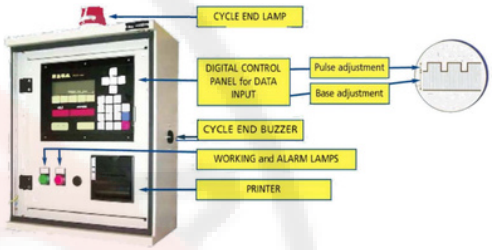

ITALTECNO Srl has applied the above technology to a number of coaters and anodizers with excellent results.

PULSE RECTIFIER

With the use of pulse rectifiers, the oxide quality is better than the one obtained with a conventional rectifier, as proved by the tests on abrasion, efficiency (ISO 321 O) and corrosion (Kestern ich).

So it is possible (without disadvantages) to work with a current density higher than conventional rectifiers. Thus the use of pulse rectifiers gives a benefit of 20- 25% time saving compared with the conventional ones.

TECNO 7S STATIC POWER SUPPLY

A new generation for aluminium colouring Power supply for conventional electrocolouring and for special processes

New power supply for electrocolouring for improved uniformity, throwing power, colouring speed.

It is a new completely static unit (no movable parts, three phase supply). It is a computerized power supply .

TOOLS

The new plier, Clamps has been studied for a better ergonomics for technicians and for a better hook and release.

Also, the electrical contact between profiles and racks is improved.

The plier is very resistant to shocks and manipulations and spring is more performing, hard enough but also elastic.

Plastic G clamps

Sealing Balls

Plastic Pliers

WASTE WATER TREATMENT PLANTS

The most updated Waste Waters Treatment solutions available as a turnkey project

Zero liquid discharge depurator

A COMPLETE RANGE OF PRODUCTION
The range of production covers all the different options available in waters treatment technology:

Evaporator for liquid concentration

Reverse osmosis

Water Deionizers

Easy Clean

<u>Waste waters Treatment:</u>

- Chemical-physical open-cycle installations
- Zero discharge closed-loop installations with evaporators
- Partial recycling installations
- Sludge treatment
- Final waters treatment

<u>Process waters Treatment:</u>

- Deionizer resin units
- Acid recovery equipment
- Phosphoric acid recovery

Primary Waters Treatment:

- Demineralizer units
- Quartz filtration
- Osmosis equipment
